

Usecase / Feature	Roles	Pass/Fail	Comments
Create and Save a Project Draft	User/Evaluator	Works	The system stores all given details to the new project and saves it as draft.
Auto-fill Questionnaire using AI Assistant Chat	User / Evaluator	Works	The system does not auto-fill the questionnaire. It throws an AI error: "Failed to process chat message". Note: When updating the field manually, The system fills the same AI Auto-fill data again instead of manually updated data by the end user. Any changes in the data by the user manually might become risky. Since on the next other prompts, the AI will again replace manually updated data into previously default AI Auto-generated data in all input fields.
Request Project Information Advice & Extract Observations	User / Evaluator	Works	The system throws an error message "Error: An error occurred: Failed to generate advice. "
Submit Project for Evaluation	User	Works	The user submits the project by clicking the submit button in the Review/Submit tab. However, The system proceeds the project as submitted with empty input fields. The

			system does not display any validation error message when input fields are not being filled. Note: The system allows the user to submit the project with empty fields.
Request Project Unlock / Edit Permission	User (Requester) / Evaluator (Reviewer)	Works	The user could send the request to the evaluator for updating the project details by clicking the button "Request Edit Permission".
Evaluate Project and Publish Verdict	Evaluator	Works	While clicking at the "Generate Evaluator Draft" button, the system throws an error message. Error: An error occurred: Failed to generate draft. Although, the manually written review or verdict could be published for the user and the evaluator shall lock the project by clicking the button "Begin Evaluation (Lock Project)". There is no button for approval, the evaluator should go to the dashboard to approve the project.
Export Project Feasibility Report (PDF)	User / Evaluator	Works	The system generates a branded PDF document and downloads to the client machine
